

Stephen J. Rourke
Vice President, System Planning

December 18, 2015

Marc Potkin
Vice President, Power Marketing
Entergy Nuclear Power Marketing
440 Hamilton Avenue
White Plains, NY 10601

Dear Mr. Potkin:

On October 12, 2015, a Non-Price Retirement ("NPR") request was submitted for the resource identified in the table below for the effective date of June 1, 2019.

Resource ID	Resource Name
537	Pilgrim Nuclear Power Station

ISO New England Inc. ("ISO-NE") has reviewed this request pursuant to ISO-NE Planning Procedure No. 10 – *Planning Procedure to Support the Forward Capacity Market* ("PP-10") and has determined there is not a local reliability need for this resource, and accordingly the NPR request is accepted.

As required in PP-10, this finding was reviewed with the Reliability Committee on December 16, 2015 and ISO-NE received an advisory vote to support that the analyses performed for this NPR request was performed in accordance with Section III.13.2.5.2.5 of the ISO-NE Transmission, Markets and Service Tariff ("ISO Tariff") and PP-10, Section 7.

Pursuant to ISO Tariff Section III.13.2.5.2.5.3, this resource and its associated market assets will be retired and the interconnection rights for the resource will terminate effective June 1, 2019. If the resource wishes to retire before this date, it must meet the requirements set forth in Section III.13.2.5.2.5.3 of the ISO Tariff.

If you have any questions, please contact ISO-NE's Customer Support at (413) 540-4220 or custserv@iso-ne.com.

Sincerely,

Stephen J. Rourke
Vice President, System Planning
